BACKGROUND

MAENERGY GROUP is a building maintenance, construction and plumbing company that offer service such as building, drainage basket installation, water meter calibration & verification, geyser installation, paving, renovation, gate and garage installation, boom gates, cctv, gardening, pump repair, industrial washing and dry machine installation, repair of toilet and installation, etc that is based in Centurion, Alberton, Gauteng. We have been able to secure all the required company clearance to run a general trading company in South Africa. We are aware that to run a general trading business can be demanding which is why we are well trained and equipped to perform excellently well.

VISION

We aim to be a preferred provider for boom gates, drainage basket installation, paving, renovations, access control, cctv, electric fence, gardening, galvanized fire horse installation and other related services

MAENERGY GROUP is a client-focused and result driven building maintenance, construction and plumbing company that provides broad-based services at an affordable fee that won't in any way put a hole in the pocket of our clients. We offer standard and professional urinal repair, drainage basket installation, building, cctv, electric fence, geyser repair, boom gate, access control, etc to all our clients at local, provincial and national level. We pride ourselves in that we employ local individuals who are skilled to maintain a high level of quality and workmanship. The founder of MAENERGY GROUP (PTY) LTD has vast experience in the building maintenance, construction and plumbing business having worked for other companies and hosting other companies as the main contractor. What sets us apart from our competitors is the fact that we gradually empower our team with the latest skills, trends and technology within our industry whilst keeping our service offering within our client's budget.

MISSION

Expanding the size and reach of our core operating model

Continually expanding the volume and diversity of our service base

Managing Cost

Focusing on sustainability and compliance with the law

Improving the lives of customers

Focusing on Safety

Respect integrity, Communication and Excellence

SAFETY, HEALTH AND ENVIRONMENTAL MANAGEMENT

MAENERGY GROUP (PTY) LTD's safety, health and environment (SHE) policy and practices centre around a zero-harm philosophy towards people, host communities and the environment.

Our company is committed to maintaining a clean environment and as a result believes this will create the ability to operate in a disciplined and sustainable manner over the long term which is fundamental to maintaining a competitive advantage and honouring the deliverables of corporate governance.

S.W.O.T ANALYSIS

Strength:

Aside from the fact that our building maintenance, construction and plumbing company is of world class standard and the business is well positioned and well-equipped to meet the 21st century demand of both high profile corporate and individual clients, we have a team that can go all the way to give our clients value for their money; a team that are trained and equipped to pay attention to details as regard building maintenance, construction and plumbing concerns. We are well positioned and we know we will attract loads of clients from the first day we open our doors for business.

Weakness:

As a new building maintenance, construction and plumbing company, it might take some time for our company to break into the market and gain acceptance from corporate clients in the already saturated building maintenance, construction and plumbing industry; that is perhaps our major weakness.

Opportunities:

The opportunities in the building maintenance, construction and plumbing industry is massive considering the number of corporate and individual clients. As a standard building maintenance, construction and plumbing company, we are ready to take advantage of any opportunity that comes our way.

Threat:

Some of the threats that we may likely face as a plumbing company operating in South Africa are unfavorable government policies, the arrival of a competitor within our location of operation and global economic downturn which usually affects purchasing cum spending power. There is hardly anything we can do as regards these threats other than to be optimistic that things will continue to work for our good.
